

The only in-court, paper-on-demand solution that connects to any case or document management system and delivers on the ease-of-use judges need to manage their courtroom.

In the race for time and productivity in the courtroom, paper has a new challenger.

Inspired by Judges, for Judges

aiSmartBench™, inspired by judges for judges, transforms the traditional courtroom workflow with efficiencies that meet or exceed current paper processes. It allows you to securely perform high-speed, full-text searches within a particular document or across all documents for a particular case while in the courtroom, in chambers, at home, or on the road.

Multiple, simultaneous “glances” are visible to present a wealth of case and related information without the encumbrances of multiple modules and multiple applications.

Its unique design streamlines your judicial processes:

- Providing contextual shortcuts to key information
- Adapting to the way you run your courtroom without custom programming
- Connecting you, through a single interface, to vital case and calendaring information
- Integrating into multiple case management systems offering the same user experience to those judges in multi-county circuits

Conceive of a day when your personal electronic expert learns and adapts its processes to how you like to work, so you can:

- Keep pace with in-court processes
- Gain immediate access to case-specific data
- Customize at-a-glance views into all aspects of a case such as:
 - All related cases (open and/or closed)
 - Up-to-date financial data and payment history related to the case
 - Snippets of case information stored with the case for immediate review and access
- Configure shortcuts to “favorite” documents based on division and case-type preferences
- Access and view specific document types such as view all motions, orders, answers and petitions, service of process, etc.

aiSmartBench works with ANY case or document management system, helping you coordinate between divisions and across counties.

Conceive of a day when you can execute high-speed, full-text searches through court documents so you can:

- Quickly locate a word or phrase within a specific document or across all documents in the case
- Create personalized research folders
- Annotate selected documents with private or shared comments
- Add notes to a case and control who can view them
- Create an on-the-fly index allowing you to jump to key information in long documents

Conceive of a day when you can work from anywhere to prepare cases, review your caseload and e-sign orders, ensuring that you can:

- Securely work anywhere
- Access all features from any web-enabled location
- Protect privacy data
- Review and e-sign orders without physically having to be present

Conceive of a day when you can choreograph how you and your court clerk will interact during court proceedings so you can:

- Configure workflows that support :
 - Rapid in-court review and e-signing
 - Paper-on-demand processes
 - End-of-the-day batch signing
 - A signing queue triggered by a target date
- Predetermine order templates and snippets for each hearing type
- Simplify the process for order creation by using the predefined suggestion lists and defaults

Technology Platform

aiSmartBench™ takes advantage of the Mentis technology platform and its arsenal of powerful technology components. It is architected easily to integrate into existing document and case management systems leveraging a jurisdiction's current investments without requiring complex system integrations. Key technology components critical to aiSmartBench™ include:

- Full-text searching across document image content
- Indexing and extracting of business critical data
- Configurable workflow components
- Bank level security and encryption
- Work anywhere, web-enabled access
- Integration management designed to export the abstracted Mentis data schema into XML standards (such as NIEM or Legal XML) as well as database formats

With  that day of conception has arrived.

For a decade, Mentis Technology Solutions, LLC. has set the bar for what is possible in document indexing and redaction. Now Mentis has reset the bar unleashing its game-changing technology with a paper-free software solution for judges to use in the courtroom and in chambers. Founded in 2000 by patent-holding software designers, its solutions are now in over 200 county court, land records, and secretary of state offices nationwide including ten of the largest counties in the country. Mentis corporate headquarters is located in Colorado with sales and marketing offices in Florida, California and Ohio.
